Description TSL-SK is a Cell Phone signal jammer with inner antenna, implementing the most effective and reliable RF jamming technology to prevent the leak of confidential information or unwanted usage of cell phones, Wi-Fi devices and GPS devices. TSL-SK has 8 sets of jamming signal generators inside, which can transmit highly effective jamming signals targeting all cell phone signal, GPS and Wi-Fi devices within the blocking range. Once you turn the jammer on, with the help of its high-gain omni-directional antennas, TSL-SK can jam continuously and simultaneously, all the RF communication Frequencies 850MHz~2660MHz which are most commonly used by cell phones and Wi-Fi devices. Adopting the latest jamming technologies, TSL-SK inner antennas jammer features ultra-high RF transmission power, making a stable shielding range around. Once the system is activated, it transmits unique noise signal which creates "Firewall" between the transmitter and its receiver (cell phone, GPS and Wi-Fi device). Besides, TSL-SK can prevent the leak of confidential information leak via cell phones or unwanted GPS location leak.
